

Serial No. **09/899,410****REMARKS**

Applicants have amended the specification to correct an inadvertent error in the specification. Specifically, the Applicants have corrected the date of filing for one of the provisional applications referenced in the priority claim in the first paragraph of the application. The Applicants had incorrectly stated that provisional patent application entitled, "Protocol to Provide Voice and Data Services via Fiber Optic Cable-Part 2," was filed on May 7, 2001 when in fact, the application was filed on May 8, 2001.

This amendment to the priority claim is being timely submitted, within the later of four months from the actual filing date of the nonprovisional application or sixteen months from the filing date of the prior provisional application as required by 37 C.F.R. 1.78.

Attached hereto is a marked-up version of the changes made to the specification by the current amendment. The attached page is captioned "Version with markings to show changes made."
